

## **FELLOWSHIP PROGRAM IN AI/ML**

### **USE CASE - DAY 22: 01.09.2018**

#### **Use case:**

The training and the test data contain the movie review and the predicted sentiment for the review statement of the movie. Do the text processing and build an model using the training data provided to classify the review statements as the positive and negative. Also predict the sentiments for the testing data and check its precision
